Line of business:

- Design, manufacturing and trade in small arms and artillery armaments, ammunition, primers, powders, charges, pyrotechnic products, hunting and sport weapons and ammunition, cemented carbide tools, tips and inserts, casting, forging etc.;
- Engineering activity.

Using the enormous experience and knowledge of its highly qualified specialists, Arsenal Company performs an energetic innovation activity, development of new products, as well as modernization of the military products, without termination of submission of the well-known articles.

The engineering activity of ARSENAL JSCo started in 1987. The Engineering Department performs transfer of know-how, helps a Customer to manufacture weapons and ammunition, installs workshops and tests equipment in the Customer`s country, trains its personnel, performs quality control and gives any necessary technical assistance.

During that period numerous Contracts have been concluded with companies all over the world for:

- Factories for production of anti-aircraft systems, grenade launchers, ammunition, etc.;
- Workshops for assembly of assault rifles, machine guns, ammunition for them, etc.;
- Workshops for electroplating and heat treatment;
- Workshops for forging-pressing processing;
- Lines for electro-mechanical machining;
- Lines for deep-hole drilling of work pieces;
- Test ranges for small arms;
- Workshops for production of special tooling, etc.

ARSENAL JSCo has a structured Quality Management System applicable for design and production of armaments, ammunition and their components in accordance with the requirements of NATO Publication- AQAP 2110. This Quality Management System is approved and certified by the Ministry of Defence, Certificate SK No 131/2017.

Performing a close cycle of production – from the raw material up to the finished product and its full completion, our Company produces, as follows:
